

Allswell Technology Inc.

Corporate Capabilities Statement

Entity: Allswell Technology Inc. (Delaware C-Corp)

Operations: Morgan Hill & Stonyford, California, USA

Specialization: Technical Validation, Safety Monitoring, Engineering Consultation, and Data Analysis & Reporting

California-Based Technical Services

- Custom Test Environment Configuration tailored to client system requirements
- Safety Monitoring Services led by ATI personnel during scheduled test windows
- Test Coordination & Management for endurance and readiness programs
- Engineering Support & Consultation for system integration and troubleshooting
- Technical Data Analysis and Reporting for endurance, payload, and interface performance

Strategic Infrastructure

ATI operates from Morgan Hill and the 160-acre Dronebase Test Center in Stonyford, California. All technical monitoring, flight coordination, and reporting services are performed by ATI personnel in the United States.

International Validation Support

ATI serves domestic and international partners who need disciplined US-based validation services, offshore monitoring, and documented technical findings.
